

that, especially in recent years, include many safety technologies. Using NHTSA's published effectiveness estimates, the model estimates how many people would have died if the vehicles had not been equipped with any of the safety technologies. In addition to equipment compliant with specific FMVSS in effect at that time, the model tallies lives saved by installations in advance of the FMVSS, back to 1960, and by non-compulsory improvements, such as pretensioners and load limiters for seat belts. FARS data has been available since 1975, but an extension of the model allows estimates of lives saved in 1960 to 1974.

A previous NHTSA study (70 FR 3975) using the same methods estimated that vehicle safety technologies had saved 328,551 lives from 1960 through 2002. The agency now estimates 613,501 lives saved from 1960 through 2012. The annual number of lives saved grew from 115 in 1960, when a small number of people used lap belts, to 27,621 in 2012, when most cars and LTVs were equipped with numerous modern safety technologies and belt use on the road achieved 86 percent.

You may read the comments received by Docket Management at the address given above under **ADDRESSES**. The hours of the Docket are indicated above in the same location.

You may also see the comments on the Internet. To read the comments on the Internet, take the following steps:

- (1) Go to the Federal Docket Management System (FDMS) at <http://www.regulations.gov>.
- (2) FDMS provides two basic methods of searching to retrieve dockets and docket materials that are available in the system: (a) "Quick Search" to search using a full-text search engine, or (b) "Advanced Search," which displays various indexed fields such as the docket name, docket identification number, phase of the action, initiating office, date of issuance, document title, document identification number, type of document, **Federal Register** reference, CFR citation, etc. Each data field in the advanced search may be searched independently or in combination with other fields, as desired. Each search yields a simultaneous display of all available information found in FDMS that is relevant to the requested subject or topic.

(3) You may download the comments. However, since the comments are imaged documents, instead of word processing documents, the "pdf" versions of the documents are word searchable.

Please note that even after the comment closing date, we will continue to file relevant information in the Docket as it becomes available. Further, some people may submit late comments. Accordingly, we recommend that you periodically check the Docket for new material.

SUPPLEMENTARY INFORMATION:

I. Background

Section 107(b) of the Reauthorization Act (Pub. L. 114-1) requires the Secretary to conduct a study on the process by which the Secretary determines whether to certify an act as an "act of terrorism" under section 102(1) of TRIA ("Certification Study"). Section 107(c) of the Reauthorization Act prescribes certain factors that the Certification Study must examine. After completing the Certification Study, the Department of the Treasury (Treasury) must submit a report on its results to Congress.

II. Solicitation for Comments

A. Collecting information and views on the factors that must be analyzed in the Certification Study will enhance the accuracy and value of the study and report to Congress. Accordingly, comments are sought on:

1. The establishment of a reasonable timeline by which the Secretary must make an accurate determination on whether to certify an act as an act of terrorism;
2. The impact that the length of any timeline proposed to be established may have on the insurance industry, policyholders, consumers, and taxpayers as a whole;
3. The factors the Secretary would evaluate and monitor during the certification process, including the ability of the Secretary to obtain the required information regarding the amount of projected and incurred losses resulting from an act which the Secretary would need in determining whether to certify the act as an act of terrorism;
4. The appropriateness, efficiency, and effectiveness of the consultation process required under section 102(1)(A) of TRIA and any recommendations on changes to the consultation process; and
5. The ability of the Secretary to provide guidance and updates to the public regarding any act that may reasonably be certified as an act of terrorism.

B. In addressing the considerations set forth in section 107(c) of the Reauthorization Act (as described in Paragraph (II)(A) of this notice), commenters are invited to submit views on:

1. The manner and extent to which the certification timeline and the Secretary's ability to make an accurate determination on whether to certify an act as an act of terrorism may be

influenced by domestic or international law enforcement processes; and

2. The implications for insurers or policyholders if one or more events are certified as acts of terrorism but the aggregate, calendar-year insured losses do not exceed the amount required for Treasury to make payments for insured losses.

Dated: February 4, 2015.

Michael T. McRaith,

Director, Federal Insurance Office.
